### Background

Customer-centric servant leader with 10+ years of industry experience in applying secure software development best practices. Skilled in gathering functional and non-functional requirements from stakeholders as well as prioritizing tasks for multiple projects. Expert at reducing technical debt through code refactoring, remediating security vulnerabilities, and resolving application performance issues. Main interests include cloud computing, cybersecurity, generative AI, and developing applications for mobile devices and the web.

### Professional Experiences

Solutions Architect, Bureau of the Fiscal Service, Puyallup, Washington.

January 19, 2025 – Present

Information and Security Services (ISS), Business Applications and Solutions Division.

Series: 2210 | Pay Schedule: GS | Grade: 14 | Step: 1 | Weekly Hours: 40

- **♦** Accomplishments:
  - ✓ Coordinated the deployment of Google reCAPTCHA to all forms in Web Feedback

Lead IT Specialist (APPSW), Bureau of the Fiscal Service, Parkersburg, West Virginia. July 4, 2021 – January 18, 2025 Information and Security Services (ISS), Business Applications and Solutions Division, Software Development Branch 3. Series: 2210 | Pay Schedule: GS | Grade: 13 | Step: 4 | Weekly Hours: 40

- ◆ Technologies: Angular, Bamboo, Confluence, Git, Gradle, IntelliJ IDEA, Java, Jira, Microsoft Azure, Spring Boot
- **♦** Accomplishments:
  - ✓ Guided a team of developers to build, test, and deploy Treasury Hunt<sup>®</sup> to an App Service instance in Microsoft Azure
  - ✓ Coordinated the integration of Common Approach to Identity Assurance for two internal web applications
  - ✓ Transferred terabytes of retired bond images in TIFF format from IBM Db2 to Microsoft Azure Blob Storage
  - ✓ Coordinated application deployments to proactively patch against vulnerabilities such as Log4Shell and Spring4Shell
  - ✓ Acquired licenses for IBM ADDI, which assists developers with discovering dependencies in applications running on z/OS®
  - ✓ Coordinated the implementation of security controls to restrict access to sensitive data (PII) in Microsoft Azure Blob Storage
  - ✓ Oversaw the development of search functions for securities in a proof-of-concept Spring Boot web application
  - $\checkmark$  Conducted lunch and learn sessions as well as live training to upskill developers and assist them in their career growth
  - ✓ Coordinated the reconfiguration of on-premises network appliances with the Enhanced Network Services (ENS) team to:
  - Reduce packet loss on the network path from internal end users' devices to an on-premises Spring Boot web application
    Forward only legitimate external web traffic to a Spring Boot web application that is hosted in Microsoft Azure
  - 66 Forward only regionnate external web trains to a Spring Boot web application that is nosted in Microsoft Azure
  - Frevent external directory traversal attacks from reaching a cloud-hosted, public-facing Spring Boot web application
  - ✓ Created a Standard Operating Procedure (SOP) for:
    - Deploying cloud resources to Microsoft Azure using bicep scripts (13.0.6.335)
    - BASD Azure Cloud Space (BACS) team members to acquire time-bound elevated privileges in Microsoft Azure (13.0.6.336)
- **♦** Recognitions:
  - **Q** Overall rating of Outstanding for calendar years 2021, 2022, 2023, and 2024<sup>1</sup>
  - Recipient of the following awards from ISS leadership for calendar year 2022:
    - ★ Breakthrough Player: An individual who has worked for 5 years or less and made a positive impact in the bureau
    - ★ Customer Centric MVP: A flexible, responsive, service-minded individual who recognizes the urgency of ISS's mission
  - **Q** Received cash awards for the following achievements:
    - ★ September 8, 2024: Provided oustanding support for Government Securities Regulations Staff's large position report call
    - ★ July 17, 2022: Built a DevSecOps pipeline for new web applications that will be deployed to Microsoft Azure
    - $\star$  July 17, 2022: Coordinated remediation efforts for many Spring web applications

IT Specialist (APPSW), Bureau of the Fiscal Service, Parkersburg, West Virginia. October 27, 2019 – July 3, 2021 Information and Security Services (ISS), Business Applications and Solutions Division, Software Development Branch 2. Series: 2210 | Pay Schedule: GS | Grade: 12 | Step: 3 | Weekly Hours: 40

- ◆ Technologies: Angular, Bamboo, Confluence, Git, Gradle, IntelliJ IDEA, Java, Jira, Spring Boot, Struts
- **♦** Accomplishments:
  - Expressed an SOP that establishes a new code review process for BASD development teams (13.0.4.17)
- **♦** Recognitions:
  - Received a cash award on April 12, 2021 for exceeding the turn-around time for bug fixes for a legacy Struts web application
  - Awarded a quality step increase (QSI) to step 3, effective March 14, 2021

<sup>&</sup>lt;sup>1</sup>Copy of appraisal with final summary rating for each calendar year available upon request

Java Developer, NIC Hawaii, Honolulu, Hawaii. September 3, 2015 – May 16, 2016 | October 24, 2016 – October 4, 2019 Developed Spring web applications for State of Hawaii government agencies: HMOAB Online Certification, Mauna Kea Recreation Area Permits, Payment Platform, Solar Water Heater Variance Request, Special Invoice Payment System.

◆ Technologies: Confluence, Git, Gradle, Java, Jira Software, Spring

Java Web Developer, University of Hawaii, Honolulu, Hawaii.

March 24, 2014 – May 2015

Established an issue-tracking and documentation process for a course management and collaboration system called Laulima and coordinated the upgrade process for the system with database and system administrators.

Software Engineer, Referentia Systems Incorporated, Honolulu, Hawaii.

August 8, 2011 - December 2013

Created reports and dashboards in the LiveAction product that display device, interface, and protocol data, and added support for configuring quality of service (QoS) on Cisco devices. **Technologies:** Java, Swing API

Level III Intern, Maui High Performance Computing Center, Kihei, Hawaii.

June 1, 2010 - July 31, 2010

During two-month internship, wrote C programs that can be used to benchmark high performance computing systems: source code

### Contributions

Zero Trust Training (ZTT) Contributor, Cloud Security Alliance.

November 13, 2023

Contributed 30 hours to review over 100 exam items purposed for the Certificate of Competence in Zero Trust (CCZT).

Participant, 2<sup>nd</sup> Hawaii Annual Code Challenge, Honolulu, Hawaii.

August 2017 – September 2017

Developed a Spring web application for the Office of Hawaiian Affairs (OHA) that exports grant data to Hawaii Open Data and displays the data in charts and a filterable table: source code

February 2014

#### Android

- O Easter Calculator calculates the date of Easter Sunday for a given year: source code | library
- O Sum of Primes generates lists of consecutive prime numbers that sum to a positive integer: source code
- O Tic-Tac-Toe is a game in which two players take turns marking spaces in a square grid with Xs and Os. The first player to successfully place marks across an entire diagonal, horizontal, or vertical row wins: library

#### **C**#

O EmporaHR is a command-line interface (CLI) application for managing employees. It is cross-platform and uses a flat-file database that is stored in the user's home directory. Unit and integration tests are written using the xUnit framework: coverage report

### **Cloud Computing**

- O Airplane Spotter leverages Azure AI Custom Vision to classify aircraft in images as a Boeing 787 or an Airbus A350: source code
- O Airport Destinations queries Oracle REST Data Services (ORDS) and then maps destinations served by selected airports. An AWS Lambda function queries an API for flight schedules twice daily and then updates the database in Oracle APEX: source code
- O Brew & Review queries an instance of an Oracle Autonomous Database for coffee sales data and then uses D3.js to display the data in a bar chart, pie chart, and line chart. Vibe coding on bolt.new was used to develop the frontend user interface: source code
- O Chamorro Dictionary Admin Console is a Java CLI application that can be configured to use Azure SQL or Amazon DynamoDB as the backend database. Resources are deployed to AWS and Microsoft Azure using Terraform.
- O Gridle is a clone of the original Wordle game. A player has six chances to guess the correct five-letter word: source code
- O Oracle Autonomous Database Example demonstrates how to connect to an Oracle Autonomous Database (ADB) instance using mutual Transport Layer Security (mTLS) authentication from a Java CLI application and a Python-based AWS Lambda function.
- O Serverless Applications is a collection of Python code that can be deployed to multiple cloud service providers using Terraform.
- O Calculator is a basic calculator that was developed using HTML, CSS, and TypeScript. It is deployed to an Amazon S3 bucket as a static website using Terraform. A Makefile is included and can be used to build a Docker image with Apache httpd: source code

#### Java

- O Advent of Code is an annual collection of Christmas-themed code challenges that follow an Advent calendar. The solutions for 2024 are written in Java.
- O Blackjack is a JavaFX desktop game that uses the Spring Framework for dependency injection and TestFX for integration testing.
- O Chamorro Dictionary (source code) is a Spring Boot web application that fetches information about Chamorro words from an API (source code) that was developed using Spring Data JPA and Spring Data REST.
- O Chamorro Language Reference is a Swing desktop application in which a user can lookup and modify Chamorro words that are stored in an H2 database. MigLayout is used to lay out all the user interface (UI) components, including a searchable table.
- O dev-bjdelacruz-commons is a library that contains custom Swing UI components and utility classes.
- O Flight Display is a JavaFX desktop application that displays information about flights arriving into or departing from an airport on a board similar to a flight information display system. Flight schedules for airports are fetched from the AirLabs Data API.
- O Hex Editor is a JavaFX desktop application that allows a user to change bits in a file up to a maximum size of 2.14 gigabytes, the highest value that a 32-bit signed integer can represent. The user can also view a file's hash values and also insert bytes (demo).
- O JLPT Word List is a Swing desktop application that retrieves information about Japanese words from a local SQLite database or a remote server on which the database resides.
- O OCMJD Bodgitt & Scarper is a Swing desktop application that was developed in 2012 as part of the requirements to fulfill the Oracle Certified Master Java SE 6 Developer certification. The application was upgraded in June 2024 to use Java 22 and JUnit 5.
- O Primes API (source code) is a Spring Boot web application that generates prime numbers for web clients. The bundled mini-game demonstrates how to use the API. The mini-game was developed using Tailwind CSS and pure JavaScript.
- O UdeMail is a JavaFX desktop email client that uses the Jakarta Mail API and allows a user to view emails, download attachments, send emails with attachments, and add multiple accounts. The Spring Framework is used for dependency injection.
- O Wordle is a JavaFX desktop game in which a player has six attempts to guess a five-letter word. Virtual threads are used to retrieve words, definitions, and parts of speech from WordsAPI. The Spring Framework is used for dependency injection.

### Low Code (Oracle APEX)

O Chamorro Dictionary is a public-facing web application that was built simply by uploading a CSV file containing Chamorro words along with corresponding English meanings. User authentication was added so that administrators can add, modify, or remove entries. **Python (Flask)** 

- O Password Checker is a tool that ethical hackers can use to validate whether a computed MD5 or SHA256 hash of a password they acquired has been leaked. It uses the rockyou.txt wordlist and wordlists from CrackStation: source code
- O Weather Now! leverages an API from OpenWeather to fetch the latest weather data for a geographic location and the GPT-40 model from OpenAI to generate a fun response to the user: source code

## Python (Qt 6)

- O File Search is a lightweight desktop application that allows users to search for text content in Excel, Word, HTML, PDF, and text files. The pdfplumber library is used to extract text from PDF files.
- O S3 Encrypter/Decrypter allows users to encrypt their files using symmetric-key algorithms such as AES before uploading them to an Amazon S3 bucket that they control. They can also download and decrypt encrypted files that they uploaded from the application. Unity
- O Super Sparty Bros. is a fun 2D platform game that can be played in a web browser: source code

### Katas

A kata  $(h^{1/2})$  is a small coding exercise or challenge that is designed to help software developers improve their skills.
